PROJECTS

RuralRoute – Smart Navigation Platform for Rural Communities | *Python, JavaScript, Maps API, SQL* |

Aug'26

- Conceptualized a location-based navigation platform addressing **incomplete road data and limited connectivity in rural regions**.
- Designed features for **offline route access, community-based road reporting, real-time road-condition updates, and regional-language voice navigation**.
- Proposed a crowdsourced mechanism allowing users to report **new roads, road closures, damaged routes, and accessibility issues**.
- Designed the system architecture and database model to support **location data, user reports, route metadata, and road-condition information**.
- Focused on building a **scalable and accessible navigation solution** that can adapt to changing rural infrastructure.

TRAINING

Python Training | Python Tutor | June' 26

- Taught Python fundamentals, including variables, data types, operators, conditional statements, loops, functions, and basic programming concepts.
- Conducted practical coding sessions and guided students through programming exercises and problem-solving.
